On access to SciFinder Scholar, from your campus or home computer, via the Main URI Library.

Note: The client version, which has been used for the past several years, will now be available only in the main library until April.

To register to use the web version of SciFinder you must: a) Be a URI student, staff or faculty member; b) Have a valid URI mail address; & c) Be on campus. To register from your campus computer go to:

https://scifinder.cas.org/registration/index.html?corpKey=4715F320-86F3-5055-1304-F820EA5DB8CA

The password selection process requires close attention to the criteria and may take several tries to register. Successful registration results in an e-mail with a link which you must click to complete the registration process with CAS. Once registered you can access the web version from on campus at:

https://scifinder.cas.org/

To use the web version of SciFinder from off campus, after you have completed the one time only registration process above, go to https://0-scifinder.cas.org.helin.uri.edu/ If you are off campus: a) You will need to log in to the HELIN proxy using your URI ID name and barcode #; & b) Then you will need to log in with your CAS SciFinder user name and password.

Additional notes: a) The web version works best with the most recent version of Internet Explorer. Firefox does not support the structural drawing program at this time. b) The library can help you with your HELIN login issues, but you will need to contact CAS if your SciFinder login stops working or you forget your password. c) We still have only a single user seat. Sessions will be disconnected after 5 minutes of inactivity to allow for other users to gain access.
