

## **Chapter 6 Vocabulary**

Calorimeter  
Calorimetry  
Chemical energy  
Closed system  
Endothermic process  
Energy  
Enthalpy  
Enthalpy of reaction  
Exothermic process  
Heat  
Heat capacity  
Isolated system  
Open system  
Potential energy  
Radiant energy  
Specific heat  
Standard enthalpy of formation  
Standard enthalpy of reaction  
Standard state  
State (of a system)  
State functions  
Surroundings  
System  
Thermal energy  
Thermochemical equations  
Thermochemistry  
Thermodynamics  
Work
